PAPERS

2438

Preparation of ellagic acid micro and nano formulations with amazingly increased water solubility by its entrapment in pectin or non-PAMAM dendrimers suitable for clinical applications

Silvana Alfei,* Federica Turrini, Silvia Catena, Paola Zunin, Brunella Parodi, Guendalina Zuccari, Anna Maria Pittaluga and Raffaella Boggia

Innovative antioxidant ellagic acid (EA) formulations suitable for oral and parenteral EA administration were achieved avoiding the use of harmful additives.
